

Learn the app in <10 minutes
GO!!

1. Go to: **www.mapps lab.org**
2. Click on Student Sign In
Enter User Name and **Password**
(Ex: User: **s0000670**
PW: **bryantturkey71**)

3. Double Click on Your Classroom Map
(ex. **TravelWell Schools 1021-4**)

Classroom Maps

Name

TravelWell Schools 1021-4

4. Find Utah on the map

5. **PIN TOOL:** Place a PIN on Utah

Click the **Pencil** on your Utah pin
Play with adding text and editing pin color and other effects

v2.1 is a Beta

Refresh Page fixes most glitches

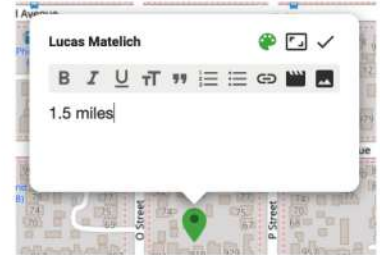

TIP: Whenever you need to **erase a pin or route** click on the **Garbage Can**

6. **ROUTE TOOL:** Draw a route measuring distance from Utah to another country
Click the route tool
Click to start adding sections of your route
Double Click to end the route

7. **Play with adding text and editing route color and other effects**
The Line Tool measures distance in miles

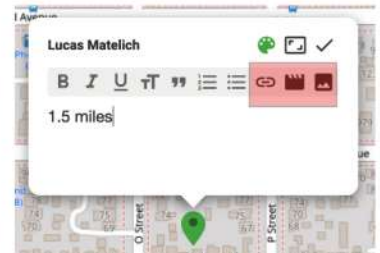

8. **Editing PIN Placement and ROUTES**

Click on Pencil and drag a Pin to move it

You can **refine your route** after you draw it by clicking the **EDIT Tool** and then Clicking and dragging the **Route Nodes**

TIP: You can add **Web Links, YouTube Videos, and Photos** to you pins and routes **PLAY!!**

MappsLab App—Adding Students—Couldn't be easier, really

Please REFRESH PAGE whenever you make a change that doesn't seem to take place
—this is a beta version
Thank You for testing

First you may need/want to create a New Class and New Class Map(s)

Add a new class. Or add to an old class

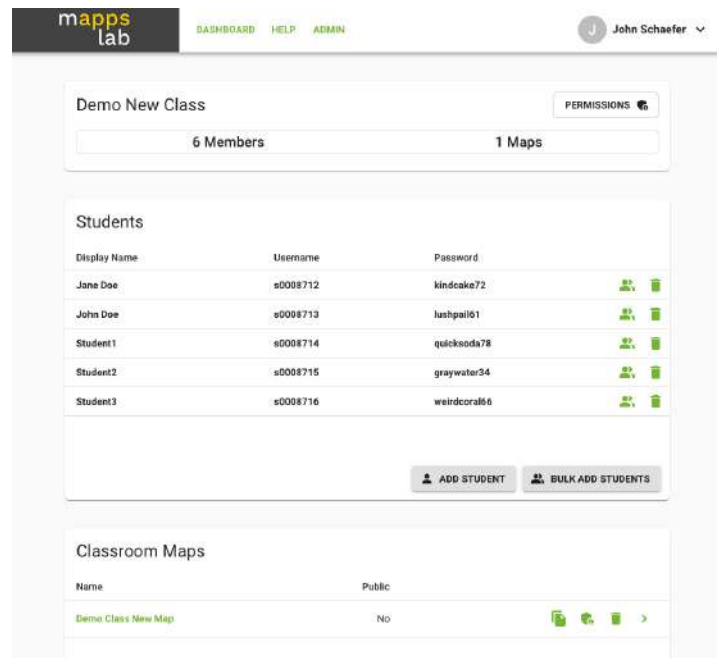

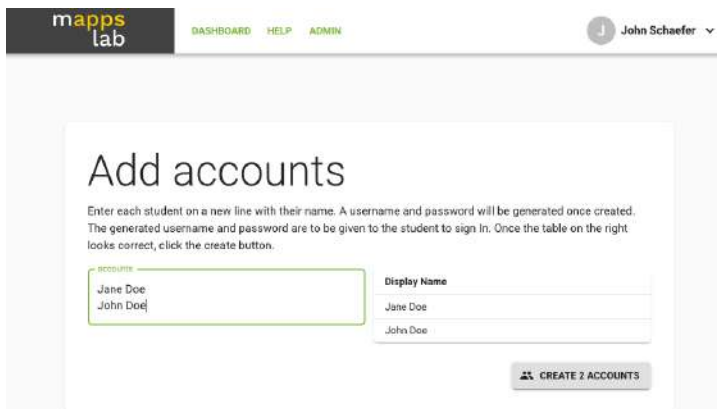

Add a new class MAP or MAPS

Adding Students—Bulk or Individually
Just copy and paste class list, or names, or numbers
Each COMMA makes a new student account
—However you want your students to be identified

—*User names and easy to remember passwords created instantly*

Play—You can easily delete names and start over
